

FRONT-END DEVELOPER · PRODUCT-FOCUSED

Thoughtful interfaces. Reliable delivery.

I'm Aayusha, a front-end developer focused on building polished, responsive digital experiences with clear business impact and strong product thinking.

A LITTLE ABOUT ME

Curiosity that turns into something useful.

Front-end developer with a product mindset

I build responsive, user-centered interfaces that turn complex requirements into clear, practical experiences for clients and end users.

My work blends design thinking, front-end engineering, and iterative improvement—creating interfaces that are usable, maintainable, and ready for real-world product use.

01

Build with purpose

Projects shaped around clear needs and real people.

02

Learn by doing

Practice, feedback, iteration, and sharing the work.

03

Built for real work

Product-driven implementation, iteration, and delivery.

MY FOUNDATION

Education & practice.

ACADEMIC BACKGROUND

B.Sc. in Computer Science and Information Technology

Amrit Science Campus · Tribhuvan University

CSIT

I combine academic fundamentals with hands-on product work to build useful, maintainable interfaces.

TOOLS I WORK WITH

Skills in production.

The tools I use to design, build, and refine product-ready interfaces.

</>

HTML & CSS

Semantic markup, responsive layouts, and styling.

Web fundamentals

JS

JavaScript

Interactive behavior and modern web fundamentals.

Interface behavior

React

Reusable components and state-driven interfaces.

Component-based UI

Git & GitHub

Version control and publishing project work.

Version control

↔

REST APIs

Working with web APIs and application data.

API fundamentals

V

Vite

Modern tooling for fast front-end development.

Build tooling

I'm continuing to strengthen these skills through hands-on work.

SELECTED WORK

Projects with impact.
